## TRAFFIC ANALYSIS SURVEY NORTH VIETNAM, LAOS AND CAMBODIA

The IBM listings of the Traffic Analysis Survey are prepared by NPIC for distribution on a weekly basis and are cumulative from 6 March 1964.

The Traffic Analysis Survey is based on specific routes in South-east Asia; however, when traffic is observed on an unnumbered route, the entry "UNN" appears under the column "Route Segment." Each listing consists of four parts presented in the following sequence:

Route Segment. . . . . Part I  
Country. . . . . Part II  
Date. . . . . Part III  
Coordinates. . . . . Part IV

All columns are labeled and are self-explanatory except for the route and segment numbers which are explained in a separately distributed route-segment key.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. The left edge of the page is bound, showing the stitching and the inner cover material. There is no text or other markings on the page.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. The left edge of the page is bound, showing the stitching and the inner cover material. There is no text or other markings on the page.

Approved For Release 2000/04/17 : CIA-RDP78B04560A003300010005-7
